

The IEEE Computer Society e-Government Special Technical Community (e-Gov STC) is a new worldwide and transversal Open Community on e-Government within IEEE. A multidisciplinary domain, related to the use of ICT in **Public Organizations**, nowadays, in the **Information Society** era.

Technology & Public Policy

Researchers and professionals are invited to join our open community to discuss ways of integrating and consolidating work and research to advance this field. Ideas in all areas are welcome.

The STC encourages research, plans lectures and workshops, and helps developing joint project ideas among potential partners all over the world, and not limited to the IEEE community.
